Slabs and Slab Construction

January 24 and 31, 2015

Tortuga Ceramic Studio
50 Center Road,
Petaluma, CA 94952
(707) 795-2451 call to reserve your space

A workshop with the details of making slabs and turning them into clay forms and shapes. During this two Saturday workshop, you will learn the timing and consistency of working with clay and which tools will work best for you with slab construction.

Day One: Making slabs and connecting them how it is done! rolling, pounding, smoothing, drying, cutting, connecting, and design

Day Two: Finishing and refining slab work prior to firing! surface finishing, shaping, cutting, carving, opening, and completing

You will need 1/4 bag of the clay you normally work with, a notebook, pencil, and be ready to transform your ideas into some original work.
